LLX

Low-loss X-over (E 530)

Crossover with a minimum number of components. The result is clear and clean sound reproduction, as well as low distortion when the volume is high.

LCX

Low-cut X-over (E 500)

Bass filter that filters out the deepest bass. Advantage: the loudspeaker can play louder and cleaner.

3S

Similar surround sound

Ensures perfect timbre matching between front and rear loudspeakers.

70W

70-watt subwoofer

The discreet subwoofer with precisely gauged performance for reproduction of music and films, without taking up more room than necessary.

ST 58

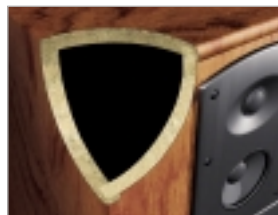

Stand (E 530)

All-round stand with spikes and optional cable management.

ST E 500

Stand (E 500)

Especially for E 500 with optional cable management.

PB

Particle board. Wooden board made from compressed wood chips. Particle board has good acoustic properties and high mechanical stability. These qualities make particle board a very suitable material for speaker cabinets.

NDT

Neodymium dome tweeter ensures clear and neutral sound reproduction of the highest frequencies.
